**Mitchell Moffit, Greg Brown : AsapSCIENCE: Answers to the World's Weirdest Questions, Most Persistent Rumors, and Unexplained Phenomena** before purchasing it in order to gage whether or not it would be worth my time, and all praised *AsapSCIENCE: Answers to the World's Weirdest Questions, Most Persistent Rumors, and Unexplained Phenomena*:

0 of 0 people found the following review helpful. Awesome fun reading to expand your brain. By M. Pelland Middle school grandson loves books and is an information magnet. He loves this and walks around quoting the facts he learns until people freak out. It's so funny and I adore giving him good info to expand his thinking. Nice book. Nice printing and paper. There are serious facts and things that make him laugh out loud. Glad I found this book. 1 of 1 people found the following review helpful. AsapSCIENCE videos in book form! By Kram Nebuer LOVE THIS BOOK, it is essentially the AsapSCIENCE Youtube videos in book form. It's a fun, clever and easy to read to pick up and browse through and also to sit and read to feed your brain. I leave it on my coffee table and guests have fun looking through it. If you're a fan of the YouTube videos, this is definitely a must buy, and if you're a fan of knowledge, this is also a must buy. I do caution sharing it with children though as some are definitely fun for kids, there are some more adult topics you might want to clear with their parents first. 1 of 1 people found the following review helpful. Wonderful read! I use it in school. By Alexandra02 Wonderful read! I use it in school. I do need to pre-read before I share allowed but the students find a lot of the information fun! It's also an easy read and Mitch and Greg explain things in such a way that is easy to understand. This book helps make science fun and keeps the curiosity for learning strong.

The instant New York Times bestselling book of entertaining, irreverent, and totally accessible illustrated answers to the scientific “questions you had no idea were bugging you all your life” (Fast Company), from the creators of the wildly popular YouTube channel AsapSCIENCE. Why do we get hung over? What would happen if you stopped sleeping? Is binge-watching TV actually bad for you? Why should I take a power nap? In their first-ever book, Mitchell Moffit and Greg Brown, the geniuses behind the YouTube channel AsapSCIENCE, explain the true science of how things work in their trademark hilarious and fascinating fashion. Applying the fun, illustrated format of their addictive videos to topics ranging from brain freeze to hiccups to the science of the snooze button, AsapSCIENCE takes the underpinnings of biology, chemistry, physics, and other hard sciences and applies them to everyday life through quirky and relatable examples that will appeal to both science nerds and those who didn't exactly ace chemistry. This is the science that people actually want to learn, shared in a friendly, engaging style. “Science is big fun. The ASAP guys get that, and they'll show you—they'll even draw you a diagram” (Bill Nye, “The Science Guy”). And amid the humor is great information and cocktail conversation fodder, all thoughtfully presented. Whether you're a total newbie or the next Albert Einstein, this guide is sure to educate and entertain...ASAP.

“From hiccup cures to the 5 second rule, this book put a bemused smile on my face and answered the oddball questions of life. An irreverent stroll through the arcane and taboo, guided by the science behind it.” (Chris Hadfield, author of "An Astronaut's Guide to Life on Earth" and "You Are Here: Around the World in 92 Minutes") "Science is big fun. The ASAP guys get that, and they'll show you—they'll even draw you a diagram." (Bill Nye “The Science Guy,” CEO, The Planetary Society and author of "Undeniable: Evolution and the Science of Creation") "From concise examinations of tiny topics like the science of love and aging, to answers to questions you actually care about--should you use the snooze button?--this book has something for everyone who is curious about the world around them. (That is to say: everyone.) This is science at its most fun, accessible, and well-illustrated." (David Epstein, author of the New York Times bestseller "The Sports Gene: Inside the Science of Extraordinary Athletic Performance") "Entertaining...valuable...particularly for the young and curious." (Publishers Weekly) “A fun read that strikes a fine balance between science and levity, offering delightful drawings relevant to the text. Each topic is presented with enough information to explain the science involved but not so much that the reader is swimming in terminology and detailed descriptions.” (Library Journal) “Science is fun! But it's even more so when Mitch and Greg get their hands on it. Gross, funny, interesting, weird: It's all science, and it's all cool.” (Phil Plait a.k.a. The Bad Astronomer, author of "Bad Astronomy and Death from the Skies!") "These guys answer the questions you had no idea were bugging you all your life." (Fast Company) About the Author Mitchell Moffit is the cocreator of the award-winning YouTube channel AsapSCIENCE. He graduated from the University of Guelph in Ontario in 2012. Greg Brown is the cocreator of the award-winning YouTube channel AsapSCIENCE. He graduated from the University of Guelph in Ontario in 2012.
